

culla

therapy and relax chair

culla

therapy and relax chair

multipurpose therapeutic chair/day bed

culla is a therapeutic and relaxing chair that conveys safety, warmth and well-being to the patient. **culla** is adjustable anywhere between sitting and lying positions using the conveniently located handle.

culla provides optimal comfort, whether sitting or lying thanks to its perfect shape and high-quality padding. The comfortable front-side entrance facilitates transfers; the pleasant concave shape adapts to the body of the subject offering support, security and warmth, while encouraging the adoption of a fetal position.

culla, developed for patients with physical and mental disabilities, offers relief to subjects with muscular problems and weaknesses; reassures those affected by Alzheimer's and Parkinson's diseases; aids in the prevention of bedsores; facilitates sitting for those who suffer from arthritis; provides relief to people with walking difficulties; strengthens the well-being and helps relaxation of individuals with anxiety and depression; encourages taking a fetal position through its cradle shape, intensifying the feeling of warmth and inner peace; sustains those that suffered from a stroke; helps those that are suffering from Huntington's chorea and those who are in a vigil coma.

culla improves the quality of life and safety of patients who spend most of their time sitting or lying down and who do not want to lose their mobility at home, in nursing homes, in hospitals, or in therapy centers and clinics.

culla care indoor

for indoor use

culla care is a therapeutic and relaxing chair that conveys safety, warmth, reassurance, and well-being to the patient. **culla** is adjustable anywhere between sitting and lying positions using the conveniently located handle.

culla care provides optimal comfort, whether sitting or lying thanks to its perfect shape and high-quality padding. The comfortable front-side entrance facilitates transfers; the pleasant concave shape adapts to the body of the subject offering support, security and warmth, while encouraging the adoption of a fetal position.

culla care is available in 4 colours: blue, green, red, yellow

TECHNICAL DATA	
total width	65 cm
length without footrest	83 cm
length with footrest	117 cm
seat width	40 cm
seat depth	48 cm
seat height	34 – 66 cm
internal back height	76 cm
weight limit	150 kg
wheels	4 full rubber 360° rotating wheels with brakes, 125/30 mm
frame	robust powder coated steel frame (FE36)
regulation system	gas inclination
coating	breathable PVC eco-leather – cotton flame retardant 11M UNI 4848 CSE RF 4/83 UNI 9175
padding	Espanso Catas UNI 9175//87 UNI 9175 FA-1/94 1.JM

culla care outdoor

for in- and outdoor use

culla care is a therapeutic and relaxing chair that conveys safety, warmth, reassurance, and well-being to the patient. **culla** is adjustable anywhere between sitting and lying positions using the conveniently located handle.

culla care provides optimal comfort, whether sitting or lying thanks to its perfect shape and high-quality padding. The comfortable front-side entrance facilitates transfers; the pleasant concave shape adapts to the body of the subject offering support, security and warmth, while encouraging the adoption of a fetal position.

culla care outdoor is extremely agile and safe for outdoor use thanks to large 400/40 wheels in full rubber and the dynamic and positioning brake system.

culla care outdoor is available in 4 colours: blue, green, red, yellow

culla balance *indoor*

for indoor use

culla balance provides optimal comfort, whether sitting or lying thanks to its perfect shape and high-quality padding in Memory Foam: a viscoelastic material which deforms with body heat and therefore maintains heat and adapts itself to the patient's spinal cord shape.

culla balance has a removable height-adjustable headrest that allows a subjective setting of the device and functions as a backrest extension. The shoulder section is larger to give more freedom. The footrest has an ergonomic design which supports the calves. The comfortable front-side entrance facilitates transfers. The pleasant concave shape adapts to the body offering support, security, and warmth while encouraging the adoption of a fetal position

culla balance is available bicolored: taupe/mandarin
