ISEO Line Bag holder trolleys

ISEO Line consists of a wide range of bag holder trolleys to collect and sort the dirty linen.

Frame in tubular stainless steel. Bag holder ring in sturdy plastic and stainless steel, integrating a hinge for the lid. Lid - available in different colours - operated by hand or by foot pedal; it closes silently, slowed by a special soft-closing system.

With ISEO Line trolleys you can easily use normal and folding bags of all sizes and materials.

All models available with or without pedal

Combined systems

Container and bag holder trolleys

Stainless steel cabinet with docking system

To hang the ISEO Line collection trolleys you need the push handle MCB.

The combined trolleys give you the possibility to organise the collection and the sorting of the soiled linen and the distribution of the clean linen. With this solution at the end of the round you can separate the two trolleys.

Technical specifications	
Product Codes	CT40
Dimensions (mm)	680x550x1150
Wheels	4 Ø 125 mm 2 with brake

Accessories for ISE0 Line

C-x
Moulded plastic lids, crash-proof,
built-in grip. Available in 5 colours.

3 easy steps to install the laundry bag

- 1- fold the bag over the rings (both plastic and stainless steel) from inside to outside
- 2- raise the stainless steel ring
- 3- with the help of the two hands, lower the stainless steel ring and place the overlapping part of the bag inside the plastic ring

See page 26 for information about the laundry bags.

MCB: push handle safeguards the hands and increase hygiene. Required to combine the collection trolley to the cabinet CT40.

CBA: additional bag holder ring.

Special wheels and reinforced frame for heavyweight transports,
e.g. full laundry bags.*

*Combined shelving unit
According to the needs, you can configure the shelving
units combining different elements and accessories.
With fix or telescopic bar for coat hangers.*

Wrapping laundry bags

On request customized bags with writing

The wide range of fabric wrapping bags combined with the broad range of collection trolleys, makes operators' work easier and safety, allows to rationalize the linen management and to plan the washing cycles.

The wrapping bags are used to collect and sort the soiled linen only once, directly at the patients' beds. The full bags are taken from the collection trolleys, transported to the laundry room and put inside the washing machine. In this way the operators are kept safe from potential contamination and injuries.

*The fabric bags are guaranteed for 2500 washing cycles, self-ironing, stain proof and water repellent.
The sealing lace is sewed up.*

The net laundry bags are mainly used in nursing homes for washing the guests' own underclothing. They can be closed with the slip-knot DN.
