

Pi-nero

Multifunction, flexible
and quick-change trolley

The new bi-colour trolley!

A service trolley that can easily transform into a medication or a therapy trolley (and many more) thanks to its flexibility and the available accessories.

Can be equipped with:

- Overbridge and accessory rails
- Accessory tubes
- Snap-on & Snap-off side rails with the SABU system
- Dozens of accessories: glovebox holders, dustbins, dispensers, ...

Easy to assemble.

Ships unassembled: knock down packaging.

Variable height overbridge – Tubes are shipped inside the
posts.

Extraordinary features

Plastic moulding

We use a system that is unique in Italy:

one single mould is used to obtain base, middle and
top shelves, all this in **bi-colour**.

The two ABS colours bind seamlessly, and are
even stronger than shelves made in a single colour.

Shelves

The retention rim is high enough to contain objects
and prevent them from falling. The 45° incline
allows for perfect cleaning and sanitisation.

Design and production

100% designed and made in Italy.

Customers

Not only hospitals, but also

- Nursing homes
- Clinics and day-care centres
- Dentists
- Veterinary clinics
- Aesthetics clinics
- use in kitchens
- and gardens
