

■ Digital Health is Moving on

Battery-Integrated and Non-Integrated Medical Carts

Why Francehopital Computer Carts?

Francehopital's computer carts enhance the efficiency of healthcare professionals: they allow direct access to clinical data at the patient's bedside, reducing errors and transcription time. They offer advanced ergonomics, with adjustable heights and customizable designs that promote comfort during long shifts. In addition, thanks to the integrated battery, they ensure uninterrupted operation even in dynamic and demanding environments.

Clinical Applications of Francehopital's Computer Carts

- Patient rounds
- Bedside patient registration
- Medication administration and traceability
- Blood draws and sample collection
- Vaccinations and immunization campaigns
- Mobile clinical documentation
- Remote care and consulting
- Support for diagnostic devices

Why Choose a Battery-Integrated Cart?

- Can be brought where it's needed
- No need for wall sockets
- No interruptions, no searching for outlets
- Continuous operation for 6 to 8 hours
- A single battery powers computer, monitor, barcode reader and other devices
- One charging point, no cable clutter
- No stop and go to swap batteries on devices
- Easier to monitor and manage energy consumption compared to scattered devices
